

FISHER™

Minimize Downtime and Risk Using Genuine Fisher Control Valve Parts

INNOVATIVE SOLUTIONS, TRUSTED RESULTS

Why Use OEM Spare?

Every genuine Fisher part meets stringent requirements for dimensional tolerances and metallurgical makeups. Besides an assurance of proper fit and finish, you also gain peace of mind that a Fisher replacement part meets the original manufacturing specifications of your Fisher control valve.

The Parts You Need, When You Need Them

ACD America and its strategic partners will catalog the control valves in your plant, assess your spare parts and service needs, and provide inventory management assistance to ensure that you have the correct parts in the right quantities for your day-to-day, planned, and unplanned maintenance events

Why Choose ACD for Your Process Control Needs?

We have more than 20 years of experience in working with process plants and providing high-quality products and services.

Plant Safety

Maintain plant safety and integrity as designed by using genuine Fisher® OEM parts

Accurate Deliveries

Receive correct parts every time with Fisher as-built control valve configurations and change history.

Inventory Management

Handle unplanned events successfully by having the necessary inventory on hand.

Control Valve Availability

Prioritize availability of critical valves by identifying long lead time parts

Control Valve Protection

Reduce potential control valve damage on commissioning with hydro and flushing trim

ACD's Qualified Team

We are committed to Excellence, Innovation, and Customer satisfaction.
